Full Stack Developer with **4+ years** of experience building scalable applications in Java, Python, React, Angular and AWS. Passionate about developing AI enabled, data driven solutions, integrating modern AI APIs and intelligent automation to create robust and user-focused systems.

Technical Skills

Languages: Java, C, Python, JavaScript, TypeScript, SQL, Shell/Bash Scripting, HTML5, CSS3, Dojo
Frameworks: Spring Boot, Spring Security, Spring MVC, Spring Cloud, Spring Batch, Hibernate, Angular 12, React, Maven, Dojo
Data and Messaging: Apache Kafka, Redis, PostgreSQL, MySQL, Oracle, MongoDB
DevOps / Cloud: Docker, Kubernetes, AWS (EC2, S3, RDS, Lambda, Amplify, VPC), GCP, Jenkins, GitHub Actions
OS and Tools: Unix/Linux, Windows, SVN, Git, Tomcat, Cursor IDE

Experience

Research Assistant, University of Michigan - Michigan, USA *May 2025 to Jan 2026*
- Assisted in software research and quality assurance for MLOps projects including a GitHub repository analysis tool with advanced search, commit filtering and reporting.
- **CI/CD integration**(GitHub Actions, Jenkins) to automate test case creation, detect inefficiencies and reliability.
- Optimized the CPS system using **Docker** by new techniques and rules to enhance performance and maintainability.

Associate System Analyst, NSEIT – Mumbai, India *Feb 2022 to Jul 2024*
- Architected and developed a high-performance **real-time trading platform** website using Java Spring Boot and Angular.
- Optimized real-time processing, ETL pipelines and system integration using Microservices architecture, OOP principles, Design Patterns, RESTful APIs and Socket Programming, improving scalability and fault tolerance.
- Designed and implemented a scalable, responsive web frontend with Angular ensuring seamless interaction with backend microservices.
- Improved data retrieval speed by 25% through Redis caching, query optimization and asynchronous data pipelines integrated with Kafka consumers.
- Led and mentored a 6-member Agile team, managing full SDLC from sprint planning and code reviews to deployment.
- Refined system performance by 20% through thread optimization, non-blocking I/O and efficient resource utilization.
- Deployed distributed services on Linux servers using CI/CD pipelines in Jenkins for automated builds, testing and rollout.

Frontend Developer, Faclon Labs – Mumbai, India *Oct 2021 to Feb 2022*
- Resolved 95% of system issues within 24 hours, boosting system reliability and client satisfaction while refining web services performance.
- Upgraded the UI with Angular Material and enhanced tables, graphs and downloadable reports through advanced caching.
- Boosted code efficiency by 20% using design patterns and modern development tools.

Project Engineer, Wipro Limited – Mumbai, India *Mar 2021 to Sep 2021*
- Developed unit, integration test cases using Junit, Mockito to validate service logic, DAO layers and REST controllers.
- Created test cases and documented defects during software development to ensure quality assurance.
- Performed defect tracking, root cause analysis and regression testing to ensure release quality and performance benchmarks.

Projects

NovaNest – *Next.js, React, Tailwind CSS, AWS*
- Built and deployed a real estate web platform allowing users to list and search properties for rent or sale, featuring interactive map integration, real-time chatbot with Amazon Lex.
- Hosted on AWS cloud using EC2, RDS, S3, Lambda, Amplify and VPC for scalability, availability and security

AI Medical Research Assistant (RAG) – *Llama 3, ChromaDB, Python*
- Designed a specialized research assistant to answer complex questions from a large corpus of 1,000+ medical journals.
- Built an end-to-end Retrieval-Augmented Generation (RAG) pipeline to ingest, chunk, and embed research papers into a ChromaDB vector store.
- Utilized LLM-powered Llama 3 and Streamlit front-end to generate accurate, context-aware answers based only on the retrieved medical data, with citations to the source papers.

AI-Powered Retail Analytics & Inventory Agent – *OpenAI, Python, GCP*
- Developed an AI-powered retail analytics platform using Python and AI agents for inventory tracking, demand forecasting, automated reporting, and customer insights.
- Built scalable REST APIs, real-time dashboards, and data pipelines with BigQuery, Kafka, and GCP services, deploying the application on Cloud Run for high availability.

Education

University of Michigan *April 2026*
Master of Science in Computer and Information Science (GPA – 3.93)

Fr. Conceicao Rodrigues College of Engineering, Mumbai University *May 2020*
Bachelor of Engineering in Electronics Engineering

Certifications

- **AWS Certified Cloud Practitioner** – Amazon Web Services
- **Foundations of User Experience (UX) Design** - Google
- **Front-end Web Development with React** – Coursera
